Companies need to stay up to date

A multi-LLM approach is key for balancing cost & utility

Cost-efficiency

Newer models offer better performance capabilities at a lower cost

Tailored Capabilities

A multi-LLM approach gives companies the flexibility to use the best model for each task

Better Performance

Newer models can deliver faster, more accurate, and context-aware responses

End of life risks

Older models become incompatible, outdated, and pose security risks

AppDirect

Switching LLMs is challenging

It's not as simple as an update

The financial burden

- **Transition overhead costs** including training, fine-tuning, and infrastructure changes.
- **Managing multiple subscriptions** with different AI vendors.
- **Integration costs** for API updates, data migration, and system reconfigurations.

Operational disruptions

- **Workflow interruptions** while adapting to new models and adjusting processes.
- **Employee retraining** to learn new systems and workflows.
- **Testing and quality assurance** to ensure the new model meets performance standards.

Performance risks

- **Differences in model outputs** requiring retraining or a workflow reconfiguration.
- **Service disruptions and delays** during the transition to new models.
- **Hallucinations** if the new model isn't fine-tuned properly.

AI is already in your company

Who is monitoring it?

Employees are exposing sensitive data

+75% of the workforce is using unapproved AI tools without oversight

No oversight = compliance nightmares

77% of companies lack a strategy to manage AI risk and governance

Is your company prepared to handle the risks?

Organizations that invest in AI governance will experience 40% fewer risks

Source: Microsoft, Deloitte, Gartner

AppDirect

25% of companies using GenAI will pilot agentic AI in 2025, growing to **50%** by 2027.

AppDirect

AI agents are on the rise

Are you enabling your workforce?

By 2028

80%

of humans will engage with
agents on a daily basis

15%

of day-to-day work decisions
will be made autonomously
through agents

We help you stay ahead of the LLM landscape

Evolve with the latest LLMs

Access the latest LLMs as they emerge with our constantly updated library

Easy model swaps

Test and switch LLMs without costly integration headaches

LLM-agnostic

Choose the best LLM for each use case without being locked into a single model

AppDirect

Build & deploy first-class agents

devs.ai

01 Customize your agent

Train your agent using your own data sources and select the LLM tailored to your needs

02 Augment agent knowledge

Utilize predefined data pipelines to augment the agent's knowledge w/o coding

04 Deploy at scale

Embed agents into your business workflows or integrate via APIs

03 Orchestrate complexity

Build sophisticated agents that manage complex workflows and perform tasks autonomously

AppDirect
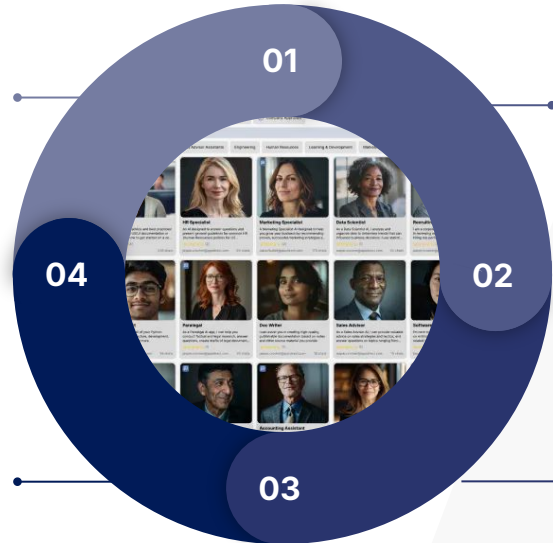

Scale across your business applications

Easily integrate throughout your organization's ecosystem

Deploy anywhere
Launch in your applications, websites, and workflows to enhance user experiences

Connect your systems
Sync with CRMs, internal tools, and business workflows for a unified experience

Leverage APIs for flexibility
Enable custom integrations, ensuring AI agents work within your existing infrastructure
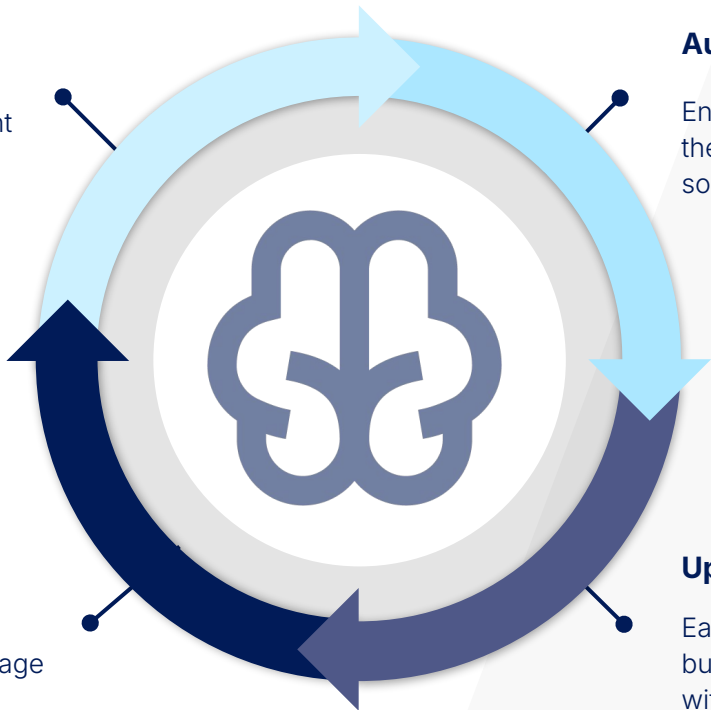

...& more

Manage the lifecycle of your agents

Iterate & optimize

Continuously refine your agent to enhance performance and expand capabilities

Automate data updates

Ensure your agent is trained on the most up-to-date data sources

Monitor metrics & spend

Gain visibility into agent performance and resource usage

Upgrade LLMs as needed

Easily swap LLMs to adapt to business needs and stay current with the LLM landscape

AppDirect

We're enterprise-first

Guarantee safe & compliant AI use across your company

Your data, your control

✔ Your data is not used to train public LLMs
✔ You decide who can see your data
✔ You can delete your data at anytime

You manage access

✔ Secure access with SSO verification
✔ Role-based access control

Comprehensive security & compliance

✔ SOC 2 Type 1 compliance
✔ GDPR compliance
✔ Hosted on a secure Azure instance
✔ Custom on-prem options

Customer stories & use cases

Customer-facing slides

Lakefield College School increases AI proficiency and productivity

Challenges

1. 28% of Lakefield staff had zero AI experience
2. Data privacy concerns with consumer-grade AI tools
3. Lack of scalable, no-code AI solutions available for academic applications

Results

43%

of school is now proficient in AI, up from 21%

+70%

of staff reported that devs.ai increased their productivity

+50

agents created w/o code to enhance learning experiences

Top use cases for AI agents today

Marketing
- ✓ Content generation
- ✓ Campaign ideation
- ✓ Market research
- ✓ CTA optimization
- ✓ Audience segmentation

Sales
- ✓ Product recommendation
- ✓ Sales data analysis
- ✓ Sales pitch creation
- ✓ Objection handling
- ✓ Product comparison

Human Resources
- ✓ Recruitment advice
- ✓ Resume comparison
- ✓ Onboarding automation
- ✓ Employee goal tracking
- ✓ HR policy compliance

Product Management
- ✓ Feature prioritization
- ✓ User feedback analysis
- ✓ Roadmap planning
- ✓ Product documentation
- ✓ Competitive analysis

IT/Software Dev
- ✓ API documentation
- ✓ Coding
- ✓ IT troubleshooting
- ✓ Technical documentation
- ✓ System integration advice

Legal
- ✓ Contract review
- ✓ Legal documentation
- ✓ Compliance verification
- ✓ Risk assessment
- ✓ Legal pitch support

There are no 'business-ready' agentic AI solutions
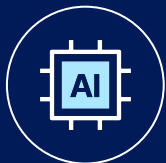

CHALLENGING LLM RELEASE CYCLE

The proliferation of new LLMs and rising costs of outdated models create financial and integration pressures to keep AI strategy current.

INEFFICIENT MANAGEMENT

Users lack the tools and visibility to easily train, monitor, and maintain their agents to ensure they remain current and perform optimally.

RESOURCE & SKILLS GAP

Building sophisticated agents is time consuming, expensive, and requires technical resources that many organizations lack.

PRIVACY & COMPLIANCE RISKS

Most AI solutions aren't designed for the enterprise and rely on public LLM platforms, raising the risk of exposing sensitive proprietary data.

AppDirect

Devs.ai can bridge the gap for your customers
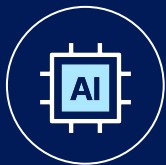

ONE PLATFORM, 30+ LLMS

Devs.ai provides centralized access to top LLMs, allowing companies to stay adaptable to new models without managing multiple plans.

AI AGENT MANAGEMENT

Devs.ai allows users to track performance and resource consumption, automate data updates, and easily swap LLMs to optimize both performance and costs.

USER-FRIENDLY AGENTIC TOOLS

Devs.ai equips users with the tools they need to harness agentic AI and build agents that automate workflows and take autonomous actions.

ENTERPRISE FIRST

Devs.ai provides better security & compliance than any foundational LLMs, allowing users to maintain the proprietary nature of their data.
