

Devs.ai Agentic AI Creation & Management

STAY AHEAD OF THE LLM LANDSCAPE

AI adoption is accelerating, but keeping up with new LLMs and securely training it on company data is costly and inefficient. Your customers need a way to stay ahead without the hassle of managing multiple AI subscriptions.

Tap into a **\$1.3T** opportunity

The AI market is set to reach \$1.3T by 2032

2 LLMs

are released weekly, often leading to

2x price increase of older models.

CAPTURE YOUR CUSTOMER'S AI SPEND

Your customers are already using ChatGPT, Anthropic, and other LLMs, so why not shift their spend through you? With devs.ai, you can offer your customers all the leading LLMs they can securely train with their data—all under one plan.

CUSTOMER CHALLENGES

Common challenges faced by your customers and prospects, and solutions to position against them.

CHALLENGE	SOLUTION
Complex LLM landscape	One platform for 30+ LLMs, allowing companies to train agents on multiple LLMs under one subscription.
Resource & skills gap	A suite of intuitive agentic tools that empower users to create agents capable of orchestrating complex workflows and automating tasks.
Inefficient AI management	Tools to automate agent updates, track performance, and manage consumption to optimize spend and performance.
Privacy & compliance risks	A secure environment for training agents on proprietary data, with user controls to ensure compliant usage.

Offer a complete agentic AI stack

Ask the right questions

Follow these steps to uncover your customer's AI needs, assess current systems, and understand long-term goals. Be attentive to key indicators in your customer's responses.

01

START THE CONVERSATION & IDENTIFY BUSINESS OBJECTIVES

QUESTIONS TO ASK

- How is your organization currently using AI?
- How do you see AI playing a role in your organization's future growth and success?
- Do you have proprietary data that you want to train your AI agents on?
- To your knowledge, how many AI tools is your company actively paying for?
- Are you incorporating AI into your processes or programmatically into your tools?

CUES TO LISTEN FOR

- We're cautious about using our data because of privacy and compliance concerns.
- We're not sure when to upgrade or migrate to a new model.
- It's hard to compare performance and capabilities across different models.
- We're paying for a few subscriptions from AI providers like OpenAI and Copilot.

02

EXPLORE AI ADOPTION CHALLENGES

QUESTIONS TO ASK

- What challenges is your company facing in adopting AI technologies, including technical, financial, or other organizational barriers?
- How do you keep your AI strategy up to date with the rapid release of new LLMs?
- Do you have specific challenges around your AI deployment projects that could use the advice, consultation, and recommendations from technical AI experts?

CUES TO LISTEN FOR

- We have great ideas for AI, but the technical side is really slowing us down.
- We've struggled with integrating AI models into our existing systems and ensuring data security throughout the process.

03

UNDERSTAND DATA PRIVACY, COMPLIANCE & MANAGEMENT PRACTICES

QUESTIONS TO ASK

- How are you guaranteeing secure and compliant AI usage across your company?
- What tools or policies do you have in place to regulate AI use within your organization?
- What regulatory requirements or compliance standards are you subject to?
- How do you currently store and manage your data?
- How do you plan to leverage your data for AI training in the future?

CUES TO LISTEN FOR

- We don't have a formal AI governance strategy yet, but we know it's something we need to address.
- Shadow AI is becoming a growing concern. We don't have full visibility into how AI tools are being used in our company.
- It's challenging to keep up with and handle new regulations as they come.

04

IDENTIFY ENTERPRISE OPPORTUNITIES

QUESTIONS TO ASK

- What current technologies are in place that could support AI integration?
- Have you identified the use cases or workflows that can be automated through AI?
- What milestones do you wish to achieve with AI and how will you measure ROI?

CUES TO LISTEN FOR

- We have cloud services, data lakes, and advanced analytics platforms.
- We want to automate workflows in areas such as sales and customer support, onboarding, and reporting.
- Our aim is to achieve a 20% increase in productivity from AI over the next year.

Overcome objections

Here are some common objections and example responses that you can use to address your customer's concerns and hesitations.

"We are already using AI tools, so we don't see the need to switch to devs.ai"

Are you spending more on tools than you need? Are they compliant and secure? With devs.ai, you get access to all the AI tools and LLMs you need under one plan, along with enterprise-grade security and compliance. Plus, you'll have access to an agentic creation studio—all at a more competitive price than relying on a single AI vendor.

"I'm concerned about the security risks of using AI solutions and sharing our proprietary data."

Data security is our top priority. Devs.ai ensures the confidentiality of your proprietary data by operating on a secure Azure instance, preventing access by public LLMs. Plus, we're fully GDPR-compliant, so your data stays protected.

"There are too many LLMs to choose from."

With devs.ai, you have the flexibility to choose the LLM that aligns with your business goals. We continuously update our LLM library to ensure you always have access to the latest and most effective LLMs to train your agents on.

"We don't have an updated infrastructure with AI processing and storing capabilities."

Devs.ai can accommodate large amounts of data processing in minimal time. It leverages modern storage solutions, powerful processors, and advanced training capabilities.

"We don't have the technical resources or knowledge to implement AI."

Devs.ai simplifies agent creation with intuitive, no-code agentic AI tools, enabling anyone to build and deploy AI agents that drive efficiency across departments. We also offer professional service packages to help you scale purpose-built agents across your company.

"I'm happy with my current strategy, why would I add cost?"

Devs.ai can actually help you save on costs. With devs.ai you get access to all the top LLMs under a single plan at 75% of the cost of a single model. This not only reduces your expenses but also ensures you're always up to date with the latest LLMs as they emerge.

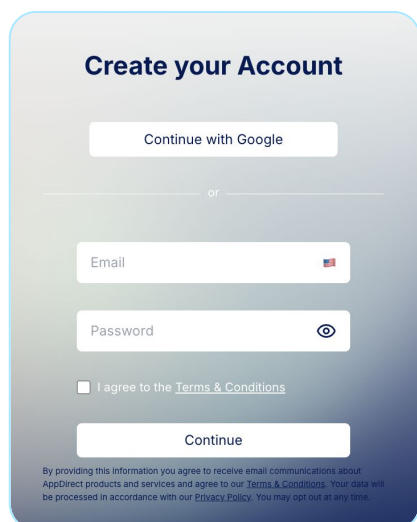

Refer your customers & earn commission
